ABOUT PHOTOSENSITIVE SEIZURES

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms including: lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures.

The risk of photosensitive epileptic seizures may be reduced by sitting further from the television screen, using a smaller television screen, playing in a well-lit room, and not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

OTHER IMPORTANT HEALTH AND SAFETY INFORMATION

The Xbox video game system documentation contains important safety and health information that you should read and understand before using this software.

AVOID DAMAGE TO YOUR TELEVISION

Do not use with certain televisions. Some televisions, especially front- or rear-projection types, can be damaged if any video games, including Xbox games, are played on them. Static images presented during the normal course of game play may "burn in" to the screen, causing a permanent shadow of the static image to appear at all times, even when video games are not being played. Similar damage may occur from static images created when placing a video game on hold or pause. Consult your television owner's manual to determine if video games can be safely played on your set. If you are unable to find this information in the owner's manual, contact your television dealer or the manufacturer to determine if video games can be played on your set.

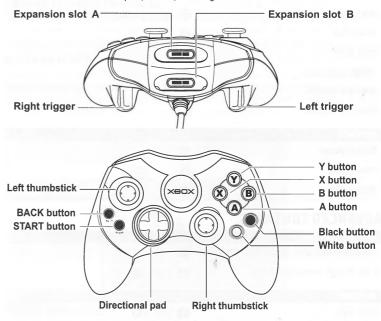

Unauthorized copying, reverse engineering, transmission, public performance, rental, pay for play, or circumvention of copy protection is strictly prohibited.

PLAYING THE GAME

Get on the ice quickly with a Play Now game.

CHOOSE TEAMS/STRATEGIES

After selecting an NHL®, National, European, or Custom team(s) for the upcoming game you have the option to adjust your team strategies. You can set your Quick Plays, along with strategies for specific lines, including your power play and penalty kill units.

QUICK SETTINGS

Select the skill level for the next game, along with camera angles, rules, and period length. To alter the playing field, adjust the Player Advantage and Goalie Advantage sliders.

From the Advanced Settings screen, set your Line Changes to AUTO, **OFF**, or MANUAL, or Shot Aim to AUTO or **MANUAL**. When set to MANUAL, you are in full control of the action.

ON THE ICE

NEW SKILL STICK

Create highlight reel goals like an NHL All-Star. Move (a) in any direction, pick your spot and execute brilliant signature moves such as spinoramas, toe drags, between-the-legs shots, and more. You control the location. You control the shot.

NEW TARGETS

Aim your shot with the help of in-net targets. During scoring opportunities, a target icon appears inside the goal posts—move during your windup to move the target to an open part of the net. Once an opening appears, shoot the puck on net. Scoring has never been so easy.

NEW CLASSIC DEKING CONTROL

Classic deke controls return. Movement on the ice is more intuitive than ever as you skate and deke simultaneously with ① . Quickly move ② to deke past opponents and fool goalies as they resort to desperation save attempts.

HINTS AND TIPS

- While skating, quickly move back and forth to deke an opponent or a goalie. The more
 movement you have with the puck the less likely it will be poked away or stolen by an
 opponent.
- Players identified with a star player indicator have the ability to perform special shots.
 During a scoring opportunity, move in any direction to pull off some unbelievable moves and shots on net.
- When attempting to check an opponent, skate into him for a small collision, tap of or a bigger hit, or hold down of for maximum impact. The more control you have over your player the more effective the hit.
- Use your speed burst wisely. Players skate faster during speed bursts but have less
 maneuverability and are more likely to lose the puck. Each player has a set amount of userinitiated speed bursts per period. Be sure to save the energy for the final minutes of each
 period.
- To increase your chances of scoring, get the goalie out of position by deking and shooting one-timers, or by setting up second-chance goals off rebounds and deflections.
- In Dynasty Mode™, placing No. 1 in profit is just as important as winning a Stanley Cup® (in regards to earning upgrade money). Also, you can earn upgrades quickly with Sim intervention.
- Created players in Dynasty Mode have the potential to be the best players in the league.
 However, they're also well aware of their market value in terms of player salary.

EMAIL

Keep up on the latest news from inside your own organization—and around the league—with email. Read messages regarding trades, notes from your owner or team trainer, and more. Be sure to read each message before they expire—emails delete if you let them sit in your inbox too long.

DYNASTY CENTRAL MENU

Make every off-the-ice move from the Dynasty Central menu. From playing the next game on your schedule to setting your Rules and Options, the everyday operations are managed here.

DAY-TO-DAY

Day-to-Day operations include playing or simulating games on the schedule, and viewing the season calendar and team reports.

GM OPTIONS

As GM you have the power to trade players, sign free agents, and view scouting reports in order to evaluate the upcoming rookie draft. You can also upgrade your staff in the front office, and adjust payroll, ticket prices, fan giveaways, concessions, and more.

COACHING OPTIONS

Take more control over the team by adjusting the practice schedule, editing lines, tweaking game strategy, and reviewing progress reports for every player on the team.

STATS CENTRAL

From overall team statistics to individual numbers, here's where you find all the stats you need.

RULES AND OPTIONS

Set rules and options to fit your style of play. Gameplay settings, display settings, sound settings, and the controller configurations are all adjusted here.

NEW ASSISTANT COACH

You have the option to pass on some of your coaching responsibilities to your assistant. When set to ON, your assistant coach fills out lines and deals with line issues. When set to MINIMAL, you set the lines but the assistant makes substitutions after a player is injured or suspended.

DURING THE SEASON

There's more to just playing the game during the 82-game season. For every hat trick, stick save, and game-winning goal, there are financial issues and unhappy players that accompany it. It's up to you to manage the organization and keep everybody happy while building hockey's next Dynasty.

NEW SIM INTERVENTION

Interrupt a simulated game to earn extra cash for your franchise. After choosing to simulate a game on the schedule, you have the option to intervene anytime during the simulation period. Once the game picks up, you'll be thrown into the middle of the action with time already off the clock. The harder the challenge, the bigger the reward. It all depends on when you decide to play the game.

MORALE

Every player on your team starts with a morale rating of 100. Morale goes down if players don't get the ice time they want, they feel you're not spending enough on Team Functions, or your team loses several games in a row. View player morale on the Progress Reports screen. When morale decreases, player attributes go down.

UPGRADE BUDGET

GMs receive an upgrade budget for their actions and their team's performance. The budget is handed out during the season based on GM performance in: profit, attendance, team winning percentage, playoff performance, trading, free agent signings, and more.

FINANCES

Manage your team's finances including concession mark-ups, the price of season tickets, taxes, player salaries, TV contracts, and more.

NEW NHL ALL-STAR GAME

About the mid-point of the season, the league's elite players gather for one night to play in the NHL All-Star game. No matter if you choose to pit East vs. West or North America vs. the World you have the option to play the game, whether you're simulating the season or not.

POSTSEASON

Once the regular season ends, the postseason begins. It's all about the games on the ice. Sixteen teams advance to the playoffs while the rest stay home. Only one will be crowned champion.

OFF-SEASON

In the off-season teams gear up for a fresh start beginning with the NHL Entry Draft. After the draft GMs have the chance to offer contracts to free agents and release players from their team. After the free agent period ends, the rosters are set and the new season begins.
